

Oklahoma School for the Deaf

Information for Parents

Oklahoma School for the Deaf (OSD) is the premier educational program for deaf and hard of hearing students in the state of Oklahoma. The following information on OSD programs is provided to help parents make informed decisions about the education of their children who are deaf or hard of hearing.

OSD is a special state supported school established by Article 13, Section 2 of the Oklahoma State Constitution to provide specialized and intensive services that focus on the unique learning needs of students who are deaf and hard of hearing.

The school is located in Sulphur, Oklahoma. OSD serves both residential and day students in pre-K through high school grades. Residential students live on campus in dormitories with house parents on site 24 hours a day.

Students attend classes Monday-Thursday. OSD transports residential students to and from various areas of the state for weekends and holidays.

OSD recognizes and addresses the educational needs and interests of each student. Every student receives instruction from staff who are specially trained to work with children and young people who are deaf and hard of hearing.

The school also partners with public schools, providing consultation and outreach for the development of effective educational programs for deaf and hard of hearing students in their home districts.

OSD's mission is to ensure that every student is equipped for life-long learning, responsible citizenship, and productive employment in an ever-changing society.

Students at OSD receive:

- Instructional methods, materials and technology specialized for deaf and hard of hearing students of all ages.
- Intensive instruction in academic, communication and independent living skills.
- Teachers trained in education of the deaf.
- An opportunity to gain knowledge about both deaf and hearing cultures and gain equal respect for the two languages, American Sign Language and English.
- Small class size – tailored to the unique needs of deaf and hard of hearing students.
- Social and cultural activities and chances to interact with students at other schools.
- Sports, recreation and physical education options.
- Training in technology skills for school and work.
- Vocational training and work experience for older students.
- A safe, supervised environment.
- OSD tuition, and room and board are free to Oklahoma families.

Toll-free: 1-888-685-3323
Phone: 580-622-4900
<http://www.osd.k12.ok.us>

OSD provides specialized educational programming that is individualized and designed to teach students the many skills they will need to succeed in school and post-secondary life.

Academic Programs

- OSD is fully accredited and teaches state-mandated education requirements. The school is accredited by the Conference of Educational Administrators of Schools and Programs for the Deaf, Inc. and North Central Association.
- OSD places strong emphasis on literacy through programs such as the Accelerated Reader and Fairview Reading Program and programs such as tutoring and remediation.

Specially Trained Teachers and Staff

- Teachers are trained and certified in deaf education.
- Teachers and other school staff are fluent in the use of sign language who can communicate directly with deaf and hard of hearing students.
- Social workers, school counselors, house parents and other staff specialize in working with students who are deaf and hard of hearing.

Opportunities to Participate in Extracurricular Activities

- Opportunity to participate in student organizations.
- Competitions in sports and academics.
- Supervised field trips include trips to sports and cultural events.
- Art, theater, dance and other cultural activities.
- OSD participates in the area Special Olympics.

Sports, Physical Education and Recreation

- All students are offered opportunities to participate in physical education.
- OSD is a hosting member of Great Plains Schools for the Deaf (GPSD) in all sports. Teams compete with both deaf and public schools and with schools in other states in the region.
- Team sports include football, basketball, volleyball, track and more.
- Athletic facilities include gymnasium, a swimming pool, weight room, dance room and tennis court.
- Games, movie theatre, TV and other recreation facilities are provided in the Student Union.

Assistive Technology – Providing Training and Tools to Access the World

- Classes teach fundamental to sophisticated computer and telecommunications technology skills.
- Classes in keyboarding, website navigation, word processing, use of notebooks and hand-held computer devices, researching, and ever-evolving telecommunications technologies.
- Computer labs help students do research and work on classroom projects.
- Students learn to use communication devices such as videophones, TTY, and relay services for greater independence at home and work.

Vocational Training and Transition to Higher Education or Work

- Occupational Training Opportunities for the Deaf (OTOD) students spend a 3-hour block every week day working on a trainee basis in the community. At the start, job coaches accompany students to work and assist in developing job skills, training and work ethics. At the employer's

discretion, the students may work without assistance at any time. The program allows students to experience several employment opportunities each school year.

- A special course in Independent Living Skills offers practical experiences in banking, budgeting of income, apartment hunting, reading and understanding bills, and other consumer skills.

Summer Programs

- OSD offers summer camps that focus on academic progress as well as social and recreational experiences for both elementary and high school age students.
- Summer camps are free of charge to students. OSD provides transportation between camp and designated sites throughout the state of Oklahoma.

OSD Student services

- An on-campus health clinic provides routine health services.
- On campus school support counseling services are available to students.
- Residential students are transported between designated sites throughout the state for weekends and holidays.
- A fully equipped school library houses books, magazines and videos for classroom, research and recreational use.

- Assuring the safety and security of all students is a top priority. The OSD campus is secured against uninvited entry. Security and fire alarm systems are in place, in addition to a comprehensive security plan.

A Statewide Resource Center

- OSD Outreach Coordinators are available to consult with public schools regarding educational services for students who are deaf and hard of hearing.
- OSD offers Sign Language

Eligibility and Admission

- To be eligible to attend OSD a student must be deaf or hard of hearing.
- The student's hearing disability must be the student's primary disability.
- The school accepts referrals from Local Education Agencies (LEAs), educational cooperatives, parents residing within the State of Oklahoma, and/or third party agencies or individuals.
- Admission to the school is accomplished through application directly from parents or guardians.
- The OSD Admissions Committee reviews the application and all pertinent documentation and determines if OSD is an appropriate placement.

Proficiency Interview testing (SLPI) for any school or community wishing to send people for the SLPI to help determine their sign language proficiency level.

- The school is a source of information on the qualifications required of educational interpreters for the deaf.
- OSD satellite pre-schools provide expertise in working with young deaf children to families living in other cities around the state.
- OSD's full time focus is on the special skills, methods and materials necessary to give deaf and hard of hearing children an equal opportunity for a quality education. OSD is the state's center of expertise in education of the deaf.

Oklahoma School for the Blind (OSB) is a vital part of educational opportunities available for blind and visually impaired students in Oklahoma. The following information on OSB programs is provided to help parents make informed decisions about the education of their children with visual impairments.

OSB was established by the state Legislature to provide specialized and intensive services that focus on the unique learning needs of students with visual disabilities.

The school is located in Muskogee, Oklahoma. It serves both residential and day students in pre-K through high school grades. Residential students live on campus in dormitory suites with house parents on site 24 hours a day.

Students attend classes Monday-Thursday. OSB transports residential students to and from their home communities for weekends and holidays.

OSB recognizes and addresses the educational needs and interests of each student. Every student receives instruction and guidance from staff who are specially trained to work with children and young people who have visual impairments.

The school also partners with public schools, providing consultation for the development of effective educational programs for visually impaired students in their home districts.

OSB offers:

- Instructional methods, materials and technology specialized for visually impaired students of all ages.
- Intensive instruction in both academics and blindness skills.
- Teachers trained and certified in education of the visually impaired.
- Small class size – individual attention to each child.
- Social and cultural activities, competitions, chances to interact with students at other schools.
- Sports, recreation and physical education options.
- Instruction in independent living skills for home, school and future life.
- Training in assistive technology skills for school and work.
- Vocational training options and work experience for older students.
- A safe, supervised environment.

PROGRAMS and SERVICES

OSB provides specialized and intensive educational programming that is individualized and designed to teach students the many skills they will need to succeed in school and post-secondary life. We offer a comprehensive curriculum of reading, language arts, mathematics, social studies, science, physical education, music and computer science for residential and day students.

Specialized instruction includes braille, orientation and mobility, optimum use of low vision, adaptive equipment and technology, and tactile graphic skills. In addition, students may receive assessment, counseling, physical therapy, speech and language therapy, hearing tests and health care services.

The secondary school program includes college preparation, vocational training and a work-study program.

Social and recreational activities include student organizations, interscholastic athletics, field trips, cultural events and community projects.

Teaching materials and instructional styles are adapted to meet the needs of each student. Independent living skills are taught to enable each student to attain maximum independence and strengthen social skills and self-esteem.

Academic programs.

OSB is accredited by Advanced Education (formerly North Central Accreditation) and teaches state-mandated education requirements. We follows all State Department of Education and Achieving Classroom Excellence (ACE) graduation requirements.

Instruction in special skills for learning and living with visual disabilities.

Instruction in adaptive communication skills, including, when needed, Braille reading and writing, use of large print and magnified instructional materials, use of tactile learning tools such as tactile maps and science diagrams, use of audio media, computer technologies and many other assistive technology devices and methods for access to information.

Orientation and mobility instruction, including white cane travel if needed. O & M training helps students navigate safely around their school and home environments, and is essential for safe travel in the larger community.

Independent living skills.

Students learn special skills, techniques and technologies that improve their ability to function independently at home, school and in the community. Students with vision loss learn adaptive skills for personal hygiene and grooming, selecting and caring for clothes, keeping bedrooms and play areas in order, eating and table etiquette, sewing, cooking, managing money, using special technologies to do household and study tasks, shopping for necessities, and many other functions of daily life that others depend on sight to accomplish.

Specially trained teachers and other staff who understand vision loss and its effects on development.

- Teachers are certified in visual impairment.
- Instructors are certified to teach orientation & mobility, communication skills including Braille, math and science learning techniques for visually impaired students, assistive technology skills, daily living skills, adaptive physical education and sports,
- vocational skills and other adaptive techniques to help students succeed in school and beyond despite their vision loss.
- Social workers, therapists, house parents and other staff specialize in working with students who have visual impairments and additional disabilities.

Opportunities to participate in extracurricular activities.

OSB's accomplished Academic Team travels across the state to compete against public schools. Students have a chance to demonstrate their academic prowess while making new friends and building self-confidence. Students can participate in student organizations such as 4-H, DECA (Distributive Education Clubs of America), FACS (Family and Consumer Science), Technology Student Association, Student Council and Girl Scouts.

OSB hosts the Regional Braille Challenge, a program of the Braille Institute. It is an academic competition unlike any other. This two-stage contest is designed to motivate blind students to emphasize their study of braille, while rewarding their success with a fun-filled, but challenging, day of events.

Supervised field trips include participation in the American Quarter Horse Association's Western Heritage Day, where students experience our state's western culture. The on-campus Panthers' Den is a snack bar and recreation center where students can participate with fellow students in a variety of supervised recreational activities including games, pool, air hockey, crafts, foosball, large screen TV and movies. Recreation staff provide organized activities such as trips to the local skating rink, movies, swimming, picnics and community events.

Sports and physical education.

- All students participate in physical education adapted to meet their individual needs. Adaptive PE is addressed in development of each child's education plan, and no child is left out.
- Swim team.
- Outdoor facilities include playgrounds, a track and a ball field.
- Planned 1K, 3 K and 5K marked courses on campus for running.
- As part of the South Central Association of Schools for the Blind (SCASB) OSB

participates in yearly competitions in Wrestling and Cheerleading. This conference includes Texas, Louisiana, Mississippi, Alabama, Georgia, and Oklahoma.

- Special Olympics, including Bocce, Music and Dance.
- Bowling.

Assistive technology – providing training and tools to access the world.

Studies have shown that students attending schools for the blind are more likely than those attending other schools to learn the range of assistive technology skills needed by visually impaired students to access the world (Kelly, S.M. & Kapperman). The assistive technology emphasis at OSB includes the following:

- Assessment to determine the student's assistive and mainstream technology needs.
- AT classes teaching fundamental to sophisticated skills.
- An AT Lab that helps students apply AT skills to classroom learning.
- Instruction on building block skill sets for accessing information on the computer.
- Classes in keyboarding, access software such as JAWS and ZoomText, website navigation using assistive technology, word processing, use of notebooks and hand-held computer devices, reading and researching using assistive technology and much more.
- Instruction in AT skills for college studies and the workplace.
- A chance to try out and learn to use a wide variety of assistive technology devices and software, to find what works best for each individual student.

Summer programs,

OSB's summer programs are open to blind and visually impaired students who attend public, private or home schools, as well as to OSB students. Summer camps vary from year to year, but are usually held as one-week sessions for elementary, secondary, technology and/or transition students. The summer sessions focus on building or reinforcing special skills while providing opportunities to participate in social and recreational activities with peers.

Outreach Services.

OSB serves as a statewide resource for students with visual impairments who do not attend our school. Outreach staff provides consultation, curriculum assistance, classroom modifications and assistance with technical equipment. Students receive free evaluations on academic achievement, orientation and mobility, low vision, psychological profiles and living skills. Early intervention services are provided to young students to help them prepare for school.

Student services.

- A school health clinic provides routine health services on campus.
- A licensed social worker is available to counsel with students and parents.
- Residential students are transported between home communities and OSB for weekends and holidays.
- Campus facilities include classroom buildings and dormitories with interior connecting hallways, play areas and equipment, cafeteria, snack bar and student recreation center.
- The OSB Library houses books and reading material in large print, Braille, and other accessible formats.
- Administration and staff: OSB is a division of the Oklahoma Department of Rehabilitation Services (DRS), which also provides services for adult blind and visually impaired Oklahomans and administers the state's Library for the Blind. A qualified school superintendent is responsible for OSB programs, staffing, facilities and day to day operations. School faculty includes certified teachers of the visually impaired, teachers with subject certifications, and teachers specialized in assistive technology, adaptive physical education, Braille instruction, and other subjects that address the educational needs of students with visual disabilities.

- Assuring the safety and security of all students is a top priority. The OSB campus is gated and a security guard is on staff. Security and fire alarm systems are in place, in addition to a comprehensive security plan.

Eligibility and admission.

- To be eligible to attend OSB a student must have a visual impairment. The impairment can be a corrected visual acuity of 20/70 or less, or a visual field no greater than 20 degrees in the better eye. Even if a student does not meet either of these criteria, he/she may also be eligible to attend OSB if there is a visual impairment which, even with the best correction, adversely affects the student's performance in the regular classroom.
- The student's visual impairment should be a major contributor to his/her inability to succeed in the public school.
- The school accepts referrals from Local Education Agencies (LEAs), educational cooperatives, parents residing within the State of Oklahoma, and/or third party agencies or individuals.
- Admission to the school is accomplished through application directly from parents or guardians.
- Each family is provided with a Student/Parent Handbook that defines policies and procedures at OSB.

A statewide resource for the education of children and youth with visual impairments.

OSB Outreach Coordinators are available to consult with public schools regarding educational services for students who have visual disabilities. OSB Outreach Department services for public school students include functional vision and learning media assessments, recommendations for classroom adaptations to accommodate specific visual conditions, recommendations on appropriate learning media and assistive technology, and linkage with specialized services.

The OSB Outreach Department also conducts in-service training programs for teachers, related staff, students and families. Our school is a center of expertise for the training of teachers of the visually impaired who serve blind and visually impaired students statewide. School faculty provide instruction to teachers enrolled in Northeastern State University's certification program for teachers of the visually impaired.

OSB is also linked to a network of expertise in education and rehabilitation of the blind and visually impaired. The school participates in the Council of Schools for the Blind (COSB), Principals of Schools for the Blind (POSB), the South Central Association of Schools for the Blind and the International Association for the Education and Rehabilitation of the Blind and Visually Impaired (AER).

OSB's Summer Camps and "Future Shock" Career Days are open to visually impaired students attending public and private schools across the state. OSB's full time focus is on the special skills, methods and materials necessary to give blind and visually impaired children an equal opportunity for a quality education.

SPECIAL SKILLS for LEARNING and SUCCESS:

Unique Educational Needs of Students with Visual Impairments

Maximizing lifelong success is the goal of education. Students with visual impairments have unique learning needs that must be addressed if they are going to access the regular core school curriculum and become independent, productive citizens to the greatest degree possible. In addition to the general education that all students receive, students with visual impairments, starting at birth, also need an expanded curriculum to meet needs directly related to their vision disability. These expanded curriculum areas include instruction in:

- Compensatory skills that permit access to the general curriculum (such as braille, communication skills, study skills, and concept development)
- Independent living skills
- Orientation and mobility skills
- Recreation and leisure skills
- Assistive technology
- Social interaction skills
- Career education
- Sensory efficiency (including visual, tactual and auditory skills), and
- Self-determination
